Introduction

- The Coronavirus pandemic has pushed companies to enforce home office concepts
- Wibu-Systems is stepping up and
 - Supporting ISVs that are embracing home office schemes
 - Leveraging its latest CmCloud technology
- Key facts:
 - Top notch security
 - Unlimited licenses / unlimited API-calls for one CmCloudContainer
 - Free of charge for Q2/2020

Technical Solution

- User brings CmDongle or laptop with CmActLicense home
- Use case similar to “offline licenses”
- Advantages:
 - No connection needed at all (VPN / Internet)
 - No additional CmContainers needed (costs)
- Disadvantages:
 - User needs to bring laptop / CmDongle home (limitations in sharing the licenses)

- License Server in the office
- VPN connection to the office network
- Use case similar to “License Server in the office”
- Advantages:
 - User doesn't need to carry any CmDongle or device
 - No additional CmContainers needed (costs)
- Disadvantages:
 - VPN needed
 - Permanent VPN connection needed

- License Server in the office
- License is borrowed for a defined timeframe to the local machine
- Use case similar to “offline licenses”
- Advantages:
 - No permanent connection needed at all (VPN / Internet)
- Disadvantages:
 - ISV needs to support borrowing (per license)
 - Borrowing needs to be renewed, limited sharing of licenses
 - Additional CmContainers needed (costs)

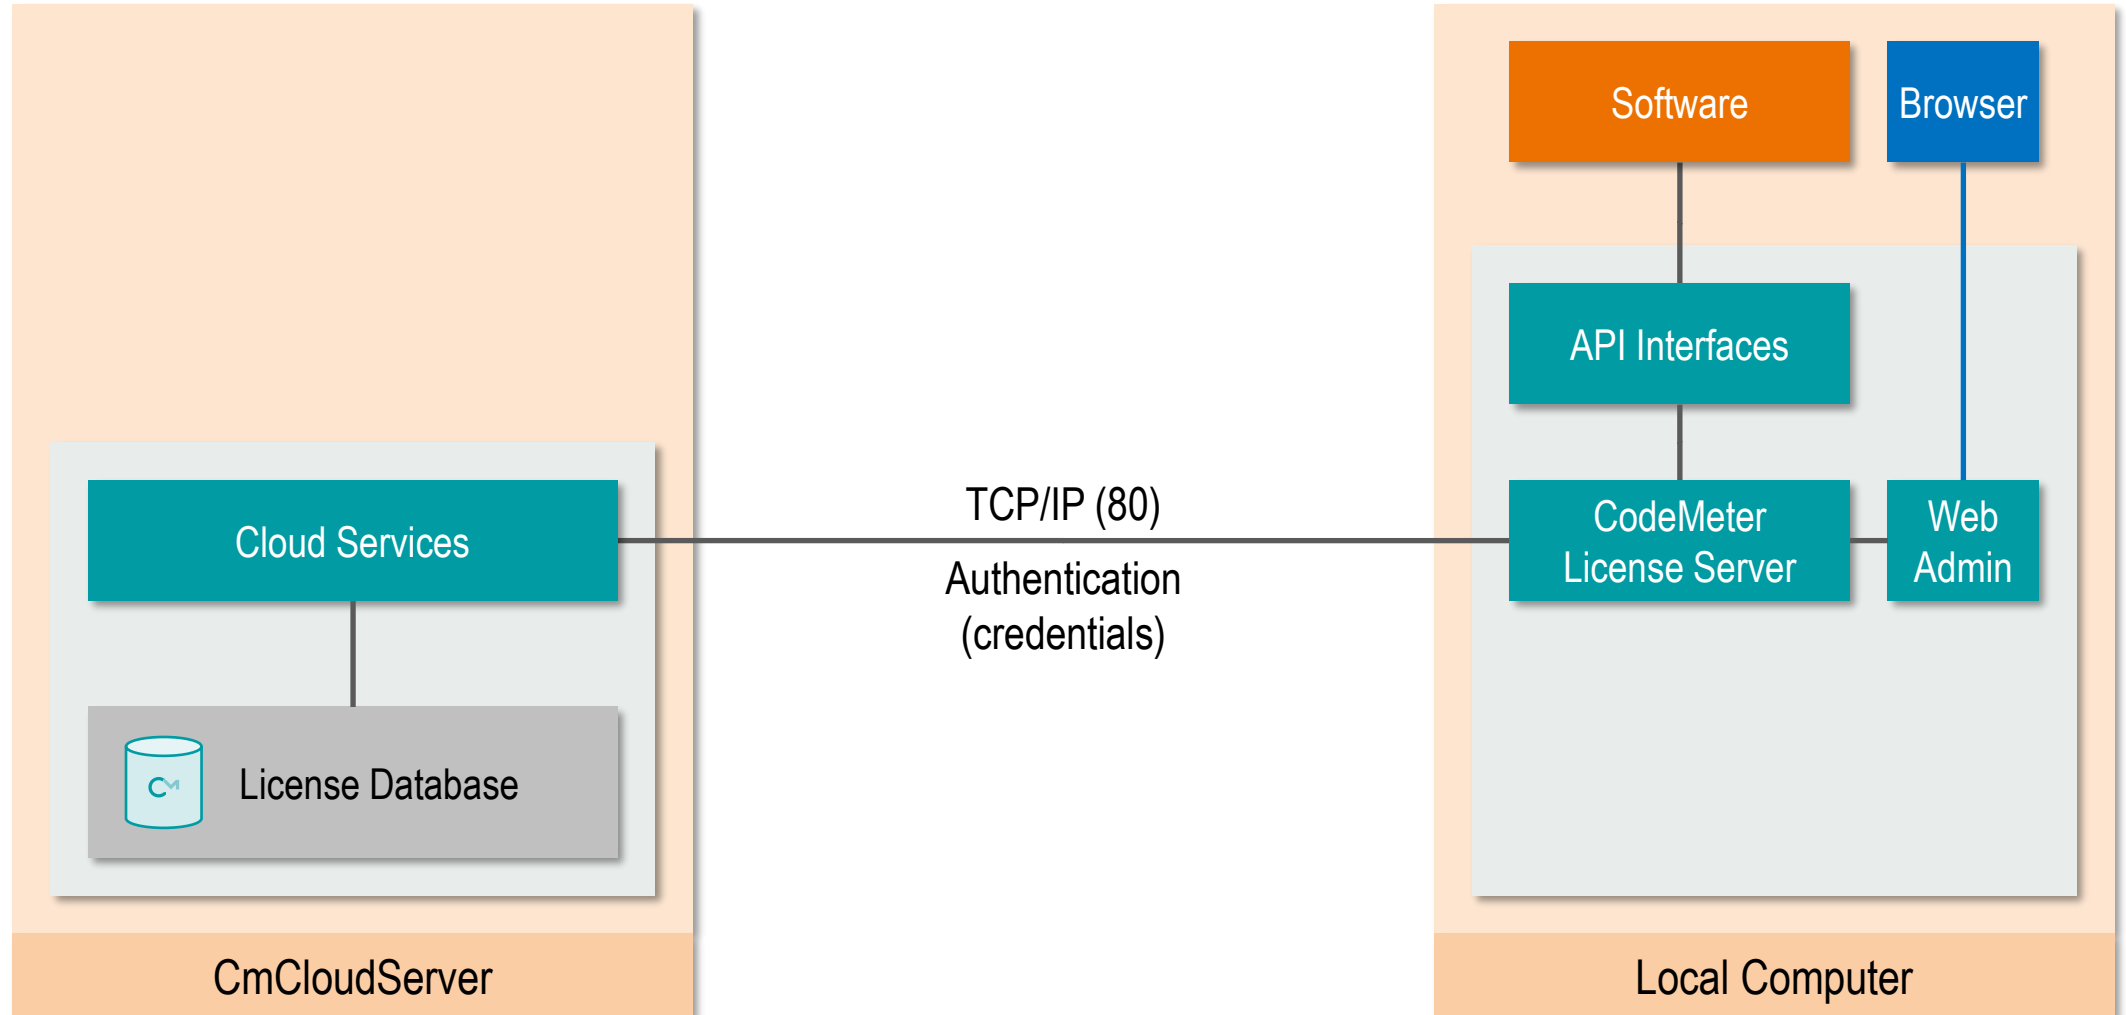

- Home Office user receives time-limited CmActLicenses
- Use case similar to “offline licenses”
- Advantages:
 - No permanent connection needed at all (VPN / Internet)
- Disadvantages:
 - Additional CmContainers needed (costs)
 - Software Activation Wizard and processes needed

- Home office users receive a CmCloudContainer (the same for all)
- Use case similar to “offline licenses”
- Advantages:
 - Only Internet connection needed, no VPN
 - License content can be extended on demand
 - No change in software needed (no Software Activation Wizard)
- Disadvantages:
 - Internet connection needed
